

## Activity 2

# ON TO ORION!

NASA is building a new spacecraft called Orion. It will have a capsule where the astronauts sit during their journey. When they get back, parachutes will help their capsule land safely on Earth.

Imagine that the egg (or object) your grown-up gives you is an astronaut testing the Orion capsule. It's your mission to help Snoopy make a parachute that will bring the astronaut back to Earth — without cracking! Ready to try? Draw your plans in this box.

A large, empty rectangular box with a black border, intended for the child to draw their parachute design.

It's been more than 50 years since Apollo 10 took the final step toward landing astronauts on the Moon. Today, NASA is preparing to travel even farther — to Mars! Start your own adventure to Mars by visiting <https://mars.nasa.gov/participate/funzone> to learn more about NASA's plans!
