# TAKE CARE OF THE EARTH

## THINK INSIDE THE BOX

The holiday season celebrates the joy of giving, but everything we give comes in boxes, bags, and paper that can be wasteful!

This activity sheet encourages you to repurpose used boxes and wrapping supplies to create even more fun and adventures!

Share your creations on social media!

## TRANSFORM YOUR BOX

### Instructions:

1. Look around your house and find a box you no longer need. During the holiday season, a lot of boxes, bags, and paper can pile up and find its way into the trash or recycling. It's good to recycle but it's even better to find a way to repurpose those items, especially when repurposing involves fun!
2. If your box is big enough, use craft supplies and other materials that can be reused as decoration to transform your box into something magical! Think outside (or rather, inside) the box! It can be a train, a spaceship, a mailbox, a tree house, or a sled! It can be anything your heart desires.
3. If you only have a smaller box, you can make a Peanuts diorama! Color in and cut-out the poses on the second page and use glue, toothpicks, markers and paint to create a beautiful winter scene! Be sure to repurpose lots of different materials like bubble wrap, packing peanuts, and old tissue paper.
4. Use your creations to play, create, and let your imagination run wild! You could even use the diorama to give as a gift this holiday season! Being creative is always best when shared with others. Regardless, you can feel good about reusing your resources to reduce waste this holiday season!
