Sometimes your creativity really blasts off when working on your own. For this solo mission, you’ll be in charge of all the choosing, cutting, and coloring that will get you to your goal: one out-of-this-world mission badge!

**Instructions**

• On page 2, you’ll see some badge shapes to inspire your inner artist. Pick one or a select a few to put together — you can even draw your own! Have a favorite person or pet you want to include on your badge? Draw them. Maybe you love pizza and want to make sure its included. Just add what’s important to you and have fun. The possibilities are infinite!

• Next, color in the shapes you’ve chosen or drawn with crayons, markers, colored pencils, or even watercolors.

• Then, cut out all the different parts you’re including in your badge.

• Finally, use tape or glue to put the pieces together and create your mission badge masterpiece!

**OPTION 1: SOLO MISSION**

Snoopy is heading to the moon — and you’re invited to join the journey!

Soon, everyone’s favorite beagle is going to space as the Zero Gravity Indicator for the Artemis I. His mission: Help NASA perform stress tests in zero gravity before sending the first woman and first person of color to the moon!

To celebrate this expedition, we want your help designing Snoopy’s Mission Patch. Every mission to the moon has its own special badge filled with meaningful symbols and colors. Now it’s up to you to create your very own!

All you need are scissors, scotch tape or glue, your favorite coloring utensils, and your imagination!

**OPTION 2: TEAM MISSION**

Just like on any lunar mission, teamwork makes the dream work when it comes to designing your mission badge! For this team project, choose two other people to help you create a mission badge that will leave everyone star struck.

**Instructions**

• On page 2, you’ll see some badge shapes to choose from. Let one person be in charge of picking a few of their favorite options. Not seeing what you want? Feel free to draw your own. You can add any number of shapes to your badge — stars, hearts, cats, french fries, you name it!

• Let the next person choose the colors that will be used on the badge and have the group assist in coloring each piece.

• Next, the third person can cut out all of the shapes and put the pieces together in a unique combination, using tape or glue to keep them securely attached.

**MISSION COMPLETE**

Once you’re finished, display your mission badge. You can tape it to your window, use a magnet to put it on your fridge, put it in your binder, stand it on your desk, or even hang it from your ceiling. Now every time you see the moon, you’ll think of Snoopy!

Be sure to watch NASA’s Artemis launch in February 2022 to show your support.
Below are various shapes you can use to create your Mission Badge!
Draw, color, and cut out your own shapes!
