Exciting news: Snoopy is headed to outer space! With our favorite canine going cosmic, now seems like the
perfect time to let your imagination take flight. If you had the opportunity to go to space like Snoopy, what
would you want to see, explore, or do? Maybe you’d want to walk on the moon, float in zero gravity, or search
for signs of life on Mars! Gaze up at the sky, daydream just a bit, and write about your ideal journey to space.

Wasn’t that fun? Now it’s time to share what you wrote with a friend or family member and ask them
about what they would do if they could go to space!

While you’re searching amongst the stars, put your beagle eyes to the test and see if you can find all of the key
words hidden below. Just circle the words in the puzzle and cross them off the list as you go. Happy hunting!

Key Words
- Space
- Ship
- Moon
- Rocket
- Helmet
- Star
- Gravity
- Snoopy
- NASA
- Artemis
As Snoopy blasts off into space, you’ll be able to see this brave beagle playing amongst the stars. In fact, if you look closely, you might even see a canine constellation come to life before your very eyes! Use a pen or pencil to connect the dots (or rather, connect the stars) to reveal a major Snoopy surprise. No telescope required!
